

## Why?

SkyMedicus is a HIPAA-compliant medical tourism company with a proprietary digital technology marketplace, which connects patients to a global network of over 500 world leaders in medicine. Over the past several years, we've helped thousands of people reap the rewards of medical tourism on all levels: cost savings, rapid access and, of course, world-class quality of healthcare.

The Centers for Disease Control and Prevention estimates that over 750,000 U.S. residents travel abroad for medical care each year.

### Why?

- Cost savings--quality care abroad on average is 25% to 90% less than care in the U.S.A.  
*Example: total knee replacement in USA ranges from \$45,000 to \$70,000. In Mexico total cost is \$9,000.*
- Procedures available abroad that are not available in the U.S.A. (i.e. stem cell therapy)
- Quality--in some cases quality of care is greater abroad, in all cases the SkyMedicus providers are equal to or better than their counterparts in the U.S.A.
- Avoid wait lists especially if Patient has chronic pain

## We Empower

As the leader in medical tourism, you can count on the SkyMedicus team to take care of EVERY detail of the Patient's successful journey, every step of the way.

At SkyMedicus, we empower the Patient with everything the Patient needs to know BEFORE they travel abroad for healthcare treatment and provide personal support during the entire process.

SkyMedicus is a comprehensive one-stop solution that is relentlessly focused on one goal: improving health.

## Accessible

## Top Quality

### Overview of Process

Patients will be connected ONLY to Qualified Healthcare Providers specific to the Patient's healthcare need. Each provider in our network is highly educated -- with many completing medical school and residency in North America, Europe or Australia. In fact, many of these elite medical professionals are inventors of a new procedures and medical devices. Every Healthcare Provider in SkyMedicus's network is thoroughly vetted, interviewed and the hospital where they practice is likewise vetted.

This includes but is not limited to:

- Reviewing each Healthcare Provider's license and keeping it on file.
- Requiring copies of all degrees, diplomas and certificates and verifying with each educational institution.
- Contacting each respective licensing agency to confirm that information is accurate and complete.
- Performing a "reputation" check of each Healthcare Provider that includes an online review and may include contacting Patient references as well.
- Upon each visit, we conduct an in depth audit of every aspect of the facility, from safety protocols to equipment updates, from sanitary requirements to emergency practices.

Accredited by such affiliations with the Joint Commission International and John Hopkins.

### Predictable & Transparent Pricing

The SkyMedicus team coordinates every last detail of the Patient's trip and assigns the Patient a Customer Success Manager to ensure every detail is organized and you are informed in advance for everything, including:

- Accommodation details (hospital, recovery center, hotel, etc.)
- How you can access 24/7 nursing care
- Airfare and Airport pick-up and return details • All ground transportation details
- Rules regarding family/friend visits while you recover
- Informing all necessary parties of allergies
- Obtaining visa/passports in as little as a day
- Exchange rates handled through SkyMedicus

### Total All Inclusive Pricing:

The SkyMedicus team will provide the patient with a personalized quote range that will NOT be exceeded during your trip. That means during the entire trip – from the moment the patient arrives at the airport through treatment and recovery period – there will be no surprise costs, hidden add-ons, or other unexpected fees that, unfortunately, many hospitals here in the U.S. are notorious for tacking on to Patients' bills. The Patient will never pay more than what has been quoted. Further SkyMedicus will coordinate all initial booking payments on the Patient's behalf, so the Patient doesn't have to worry about currency exchange or whether they're paying at the right time (hospital bureaucracy is universal and payment rules can be complex!)

### After Selection...

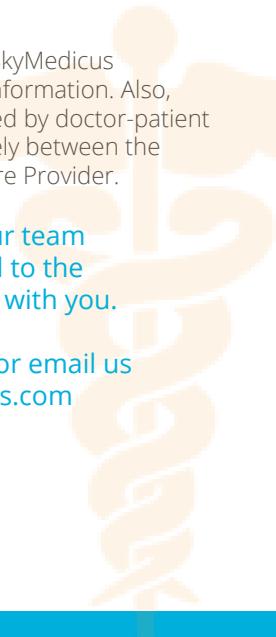

#### After A Healthcare Provider Is Selected:

The Patient may use SkyMedicus' innovative HIPAA-compliant web portal to communicate securely and directly with your chosen Healthcare Provider.

During these private conversations, the Patient can:

- Share health records
- Discuss specific health concerns
- Ask questions about treatment, recovery, facilities and more
- Facilitate communication with the Patient's local physician to plan for recovery returning home
- Schedule a Skype video call or video conference call with the entire team
- ...and cover anything else that the Patient deems important and relevant

Also please note that the SkyMedicus team does NOT ever sell information. Also, conversations are protected by doctor-patient confidentiality and are solely between the Patient and their Healthcare Provider.
