Top Quality Care

Credentialed Physicians

Now you have access to the world's largest network of credentialed, top physicians and medical service providers.

The Credentialing Process

One of SkyMedicus' most important jobs is credentialing the doctors and hospitals we work with. Our goal is to put you in the best of hands when you travel for a medical procedure. We do that by being highly selective in accepting physicians and medical facilities into our network.

We're the only care-abroad facilitator in the world that actually conducts a site visit and does personal interviews before accepting a physician into our network.

And, we've been doing it for more than 10 years. We've helped thousands of patients find health care abroad, without a single complication or injury related to treatment.

We do thorough site inspections and licensing verifications of every single physician in our network – to ensure you're in the best of hands.
