## **Sailesh Chutani, PhD, CEO and Co-Founder, Mobisante, Inc. to be featured speaker at World Health Innovation Summit, April 4-6, Washington, D.C.**

**WASHINGTON, D.C. March 4, 2011** – The World Health Innovation Summit, co-located with the 8<sup>th</sup> Annual World Health Care Congress, is pleased to announce Sailesh Chutani, PhD, CEO and Co-Founder, Mobisante, will be a featured presenter at the summit, April 4-6, 2011 in Washington, D.C.

Mobisante, Inc., is an mHealth company that has built smart phone-based personal, affordable and easy to use ultrasound systems. These award-winning systems have the potential to democratize ultrasound imaging.

The 2<sup>nd</sup> Annual World Health Innovation Summit will convene more than 40 global health care innovators and feature innovations from the developing world that can be applied to the United States and other industrialized countries. [www.worldhealthcarecongress.com/whis](http://www.worldhealthcarecongress.com/whis). It is part of the 8<sup>th</sup> Annual World Health Care Congress, an annual meeting of more the 1,800 senior health care executives from all industry sectors. [www.worldhealthcarecongress.com](http://www.worldhealthcarecongress.com).

Mr. Chutani will participate in a keynote panel discussion on “Advances in Point-of-Care Diagnostics to Diagnose and Treat Earlier” Tuesday, April 5 at 11:40 a.m.

### **Specifically, he will address:**

- Innovative tools for diagnosing disease in developing countries
- The social and economic potential of bringing equitable health care to low-resource regions
- Long-term strategies for solving global health delivery challenges
- Innovations in product and business models for sustainable solutions

Prior to Mobisante, Mr. Chutani managed \$100m worth of exploratory research and development in Microsoft Research in emerging technologies to identify and seed new businesses. Sailesh pioneered Microsoft’s engagement in personalized medicine, bioinformatics, and systems biology. He was an early visionary who championed cell phone technologies in healthcare, especially to meet the needs of the under-served segments of society.

“Countries in the developing world focused on providing access to basic health care to their population are innovating out of necessity. Their innovations can help the developed world improve efficiency and reduce costs. This summit is a unique opportunity for such cross-pollination to happen.”, according to Chutani.

### **About Mobisante**

Mobisante, Inc. is a privately held mHealth product and services company. Its goal is to make ultrasound imaging personal, accessible, and connected to help health care professionals practice better medicine and to reduce costs.

### **About the 2<sup>nd</sup> Annual World Health Innovation Summit**

Co-located with the 8<sup>th</sup> Annual World Health Care Congress, the WHCC 2nd Annual World Health Innovations Summit (WHIS) features innovations in the developing world to be adapted and implemented in the developed world. WHIS convenes an international delegation of ministers of health, high-ranking government leaders, CEOs, CFOs, CMOs, CIOs, CMIOs, CAOs, VPs of international patients and VPs of international business development from the world’s leading hospitals, as well as CEOs, CFOs, CMOs, actuaries, medical directors and international network directors from national and international health plans and insurers. This impressive international delegation convenes to exchange strategies on innovations in financing affordable care, new and sustainable primary care infrastructures, and innovative delivery models to deliver low cost, high quality care and other critical issues. International leaders also present disruptive innovations in health IT, mHealth and innovative point-of-care diagnostic technologies as well as breakthroughs in health care research.
